## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-17 are allowed. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose a generally spherical zero valent iron particles having porosity greater than 0.1. The prior art does not teach the preparation of that particle being: a) preparing a generally spherical substrate of a material that can be converted to volatile matter or a gas at elevated temperature; b) coating said substrate with metallic iron to form a substantially continuous layer at least 0.25 nm thick; c) exposing said coated substrate to one of a chemical reagent or a temperature high enough to remove said substrate to form a hollow iron particle; and d) reducing iron oxides in said particle to metallic iron. The closest prior art is WO 98/49106 Alveraz. The prior art does disclose iron particles having porosity greater than 0.1 or the method of use of the said zero valent particles and does not disclose the method including using a substrate that can be converted to a volatile matter or that the porosity of the particle is 1.
